Burn Studies

RUMANIA

MARES, E., Lieutenant-General, Medical Corps, Dr. and Docent in Medical Sciences, Physician Emeritus (General-locotenent medic, doctor docent in stiinte medicale, medic emerit); NESTORESCU, N., Prof. Dr., Correspondent Member at Academy Republic of Socialist Rumania (membru corespondent al Academiei Republicii Socialiste Romania), and BONA, C., Dr.

"Immunology of Burns"

Bucharest, Revista Sanitara Militara, Vol 16, Special No., 1965; pp 85-92

Abstract: Immunology of patients with burns; review of applicable aspects of antigen formation generally and in burns specifically; skin, liver, kidney and biochemical events in burned patients; chemical structure of antigens involved; relationship between antigens in burns and their direct toxic effect; formation of antibodies and clinical aspects. Data from authors' studies on dogs and in vitro are presented in the context of these topics.

NESTORESCU, N., Prof. Dr., Member Correspondent of the Academy of Socialist Republic of Rumania (membru corespondent al Academiei Republicii Socialiste Romania); CIPLEA, Al., BONA C., POTORAC, E., URZICEANU, N., Colonel, Medical Corps; and STRATI, I., Lieutenant-Colonel, Medical Corps.

"Experimental Studies on Burn Disease: Part 1 - Contribution to the Study of Histopathological Modifications in the Acute Phase of the Severe Experimental Burn (24 to 48 hours)"

Bucharest, Revista Sanitara Militara, Vol 16, Special No., 1965; pp 104-106

Abstract: Comprehensive data on experimental study in groups of 30 dogs (including 10 controls in each group), studying histopathologically the various tissues 6, 24, and 48 hours after the burn; with stress on adrenals, kidney and spleen lesions. Conclusion is that there is a definite pathological process whose stages can be differentiated; the nucleic acid content in various tissues is revelatory of the stage of disease.

NESTORESCU, N., Prof. Dr., Member Correspondent of the Academy of the Socialist Republic of Rumania (membru corespondent al Academiei Republicii Socialiste Romania); CIPLEA, Al., BONA C., POTORAC, E., URZICEANU, N., Colonel, Medical Corps; and STRATI, I., Lieutenant-Colonel, Medical Corps.

"Experimental Studies on Burn Disease: Part 2 - Contribution to the Study of Changes in the Spinal and Peripheral Blood During the Course of the Severe Acute Phase of Experimental Burns, 24 to 48 hours after the Burn".

Bucharest, Revista Sanitara Militara, Vol 16, Special No., 1965; pp 106-110

Abstract: Study of bone marrow cytology in dogs 24 and 48 hours after severe burns; trends in leukocyte and erythrocyte series are reported and discussed. There is a marked difference between the two stages, i.e., hemoconcentration with erythrocytosis first, turning later to anemia; exhaustion of reticulo-endothelial system is part of the second phase. 3 photomicrographs.

Title : Extraction of Inorganic Ions with Organic Solvents. I.
Continuous Extraction of Uranyl Nitrate with Tetrahydro-
sylvane and Tetrahydro Pyrane.

Orig Pub : Croat. chem. acta, 1956, 28, No 1, 9-12

Abstract : Tetrahydrosylvane (I) and tetrahydropyrane (II) are much more effective extraction agents for $\text{UO}_2(\text{NO}_3)_2$ (III) than ethyl ether (IV) and ethyl acetate (V). With a constant concentration of HNO_3 (0.25 N) and III (1 mg U in 12 ml) in the aqueous phase, % of extracted III increases with concentration of NH_4NO_3 . The salting-out effect of NH_4NO_3 is least pronounced on using IV and V as extracting agents. The most effective extracting agent is I which removes 100% U from a solution that is 0.8 N in NH_4NO_3 . II extracts III completely

AUTHOR BONAMI, A.A. 20-6-2/59
TITLE On the Mean Moduli of the Analytical Functions.
(O srednih moduley analiticheskikh funktsiy -Russian)
PERIODICAL Doklady Akademii Nauk SSSR, 1957, Vol 113, Nr 6, pp 1195-1198 (U.S.S.R.)
Received 7/1957 Reviewed 8/1957
ABSTRACT The author here describes the stripe $\alpha < \operatorname{Re} z < \beta$ of finite width with $S(\alpha, \beta) = S$ and the stripe $\alpha < \operatorname{Re} z \leq \beta$ with $S[\alpha, \beta]$. HARDY, INGHAM and POLYA investigated mean values of the kind $\varphi_p(x, y) = (1/2y) \int_{-y}^y |f(x+iy)|^p d\gamma (p > 0)$, where the functions $f(z) = f(x+iy)$ satisfy the following conditions:
a) $f(z)$ is analytical in $S(\alpha, \beta)$ and steady in any finite part of $S[\alpha, \beta]$.
b) in $S(\alpha, \beta)$, $f(z) = O(e^{k|y|})$, $0 < k < (\pi/(\beta-\alpha))$ applies uniformly.
The present paper gives analogous theorems in which no theorems of steadiness are imposed upon the functions on the boundary of the domain. Further, the author as a rule puts $\alpha=0$ and $\beta=\pi$ in front, though the results are valid also in the general case. The functions investigated always ought to be analytical within the stripe. The paper consists nearly entirely of data given on lemmata and theorems. Some of them can be described as theorems of the type of the theorem by PRAGMAN-LINDELOEF for the mean values $\varphi_p(x, y)$. Their proofs are based upon the integral representations of cer-

Title : Corrosion Resistance of Domestic Coal Materials in
Sulfite Solutions.

Orig Pub : Przem. chem., 1957, 13, No 11, 669-672

Abstract : The technological process of manufacturing coal (C) and graphite (G) materials at the electrode factory at Racibuzh (Poland) is described. The chemical resistance and the resistance to temperature changes of graphite materials is considerably higher than those of coal materials. The determination of some physical-chemical properties and chemical resistance was carried out for 1/ non-impregnated C, G and C-G materials, and

TITLE : Jerusalem Artichoke as Raw Material in the
Alcohol Industry
ORIG. PUB. : Przem. rolny, 1959, 4, No 5, 19-23

ABSTRACT : It is shown on the basis of current data
that it is economically advantageous to increase planting
of Jerusalem Artichoke in Poland for use as a valuable
feed crop (tubers and green plant material) and technical
raw material for the production of alcohol in conjunction
with utilization of the vinasse as cattle feed.
